Notes on project rubric

Grade Band	Assessment	Analytics	Member	Deployment	Trainer
Starter	Assessment data loaded from yaml	Assessment list implemented			
Baseline	Multiple assessments and "add assessment" form implemented	Current BMI displayed on Member Dashboard	Member model implemented with all fields		
Good	Assessments available to view on the member dashboard	Current BMI category displayed on dashboard	Sign-up and login implemented		
Excellent	Comment field included in each assessment	Ideal Body Weight displayed on the member dashboard. Icon colour changes to green for true, red for false Some GymUtility code (partially) shared - it's not identical	Update details/settings page implemented, with current values as placeholders in the form fields.	Deployed	Trainer account from yaml implemented. Trainer can log in and comment on assessments
Outstanding	Date/Time for assessments implement Assessments listed with newest at the top	Red/Green Arrows for weight increase/decrease, blue horizontal line for no change. GYMUtility component is not fully shared with programming - the code is mostly similar	Deletion of assessments by members implemented	Git Repo & Deployed via GitHub	User deletion by Trainers implemented

Additional Comments:

Sorting of the assessments is implemented by automatically recording the date/time upon adding an assessment, and the assessment is added at the 0 index of the assessments ArrayList, thus preserving reverse chronological order.
